- The research artifact I found is [7 Benefits of AI in Education -- THE Journal](#)
- I believe it is credible because the creator is David Karandish, who is a founder and CEO of an AI Software Service.
- When it comes to **AI in the classroom**, I believe it can be very beneficial, and very useful for teachers and students.
- My research artifact supports this position because the article talks about the different ways teachers and students can benefit from AI in the classroom.
